

The American Association of State Highway and Transportation Officials is an organization that sets standards for highway design and construction. Most AASHTO standards are direct equivalents to existing ASTM standards.

The AASHTO M164 specification covers high strength heavy hex structural bolts from 1/2" diameter through 1-1/2" diameter. These bolts are intended for use in structural connections and therefore have shorter thread lengths than standard hex bolts. This standard is identical to ASTM A325.
